**Ketchum, ID (For Immediate Release)** Long the leader and innovator in interchangeable eye wear, Smith Optics is releasing a new performance duo this season for the active outdoor crowd: the Parallel and Parallel Max. Designed with sleek and subtle lines and intuitive, smudge-free lens changes, these two new styles epitomize minimal mass and maximum coverage.

**Parallel Max Smoke Green Mirror**

Sharing the same frame with two different lens profiles, the Parallel is designed with slightly smaller coverage than its larger lensed sibling, the Parallel Max. Intended for the range of outdoor pursuits including running, climbing, biking, hiking, and nearly everything else under the sun where maximum protection from the elements in lightweight and light-fitting eye wear is a must, these two new medium fit pieces cover the spectrum of active sports. Using a shatter proof and cranium cuddling Grilamid TR90 frame with Megol hydrophylic nose and temple pads, this new introduction stays put and lets you focus on the task at hand.

Fitted with 8 Base Carbonic lenses featuring Smith's standard-setting TLT (Tapered Lens Technology) Optics, a precise thinning of the lens from the center to the periphery to compensate for lens curvature and ensure ultra crisp, optically precise vision, this duo guarantees that the one thing which won't be exhausted at the end of the day are your eyes.

These two pieces come standard with a Polarized Gray or Polarized Brown lens set (depending on color way) installed with Ignitor and Clear replacement lens sets included for \$149. New for this year, the Parallel and Parallel Max are also available with single lens options for \$100: Parallel Max Smoke with Green Mirror lenses, Parallel Max Black with Ignitor, Parallel Ivory Chocolate with Bronze, or Parallel Gunmetal with Ignitor.

Like all Smith Products, the Parallel and Parallel Max are covered by Smith's True Lifetime Warranty. For more information on these and the rest of the Smith product family visit: [www.smithoptics.com](http://www.smithoptics.com).

**Parallel Black Polarized Gray \$149**
